

What is Encryption?

- The process of converting the data or information into meaningless form.

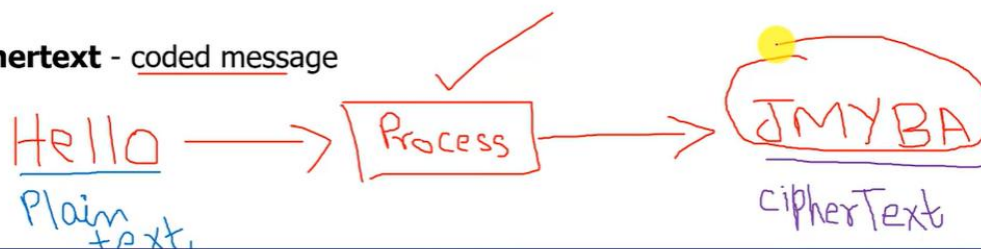

Some Basic Terminology

- **plaintext** - original message

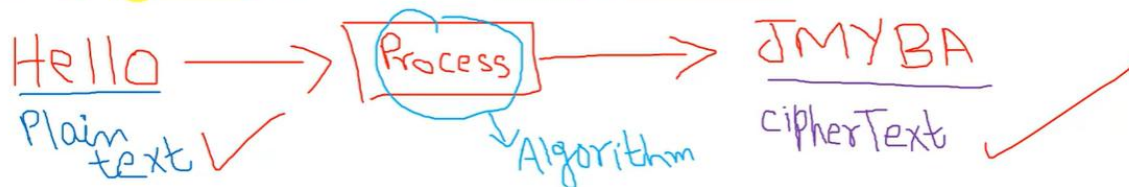

- **ciphertext** - coded message

Some Basic Terminology

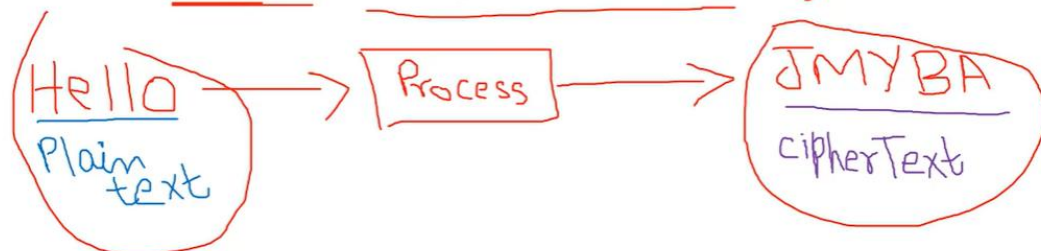

- **cipher** - algorithm for transforming plaintext to ciphertext

- **key** - info used in cipher known only to sender/receiver

Some Basic Terminology

- **encipher (encrypt)** - converting plaintext to ciphertext

- **decipher (decrypt)** - recovering plaintext from ciphertext

Some Basic Terminology

✓ cryptography - study of encryption principles/methods

✓ cryptanalysis (codebreaking) - study of principles/ methods of deciphering ciphertext without knowing key

✓ cryptology - field of both cryptography and cryptanalysis
